

# A MESSAGE FROM THE PRESIDENT

I am pleased to see that despite our diverse ethnic ancestry, we are still coming together with a common mission of working to improve our social and cultural practices for the betterment of our descendants and our brothers.

I would like to welcome our brothers and sisters of Kansas City into our Halala family and also invite them to our next annual General meeting taking place in August.

Today Halala USA is focused on implementing a mobile clinic model to residents of western Kenya.

Two fundraising events have taken place in Virginia, New Jersey and many more are on the way.

The project intends to provide basic health care needs to all residents of western Kenya who may not have access to health care facilities due to age, distance or financial. Halala also plans to establish self help projects that would help provide financial aid to students who excel in mathematics and science subjects in the region.

I am inviting all men and women of good will to come and support these efforts. Lets stop giving empty promises and start focusing on meaningful projects that will bring meaningful progress to our region.

Its time to start doing more and talking less.

The purpose of Halala is to create a framework upon which we would transcend sub tribal buriers and start supporting our people as one big family.

Our dream at Halala is to build a prosperous Luhyias community that will be admired all over the world.

Halala USA is now five years and are proud to have made significant strides towards that direction. Today we are involved in supporting local school in western Kenya and our next goal is to venture into health care.

Our future lies in the hands of good leadership. Halala leader are the first line of defence for the organization. You will be intimidated, criticized accused for what you have not done by those who have kept us underdeveloped for many years. Its time to send a clear message of togetherness and embrace unity.

Halala is the ship on which peace, unity and development in western Kenya will be delivered. Buy your ticket today and get on the ship history will remember you for having done the right thing.

Membership to Halala is voluntary and only members are entitled to Halala's annual reports.

Recently I issued a statement disassociating the organization and politics that was met with a lot of controversy many politicians are upset with me for closing that door on them. I would like to clarify that at Halala we remain non-political, non-denomination, non-profit and voluntary.

My decision has gained support by all those who love miremba all around the world.

Halala USA has not established **Halala International** and creation of such entity will have to done by Halala people.

Those intending to create Halala International away from Halala framework will be doing so illegally and in violation of Halala policy and procedures.

In Halala all changes and new establishments must be done through proper channels before being implemented.

As a community lets work together to see success, lets fight hatred, disunity, poverty and illiteracy to achieve our common goal.

I am appealing to all Halala registered members/chapters to be on the look for those with intent to create divisions.

Together we can make a difference come join us.

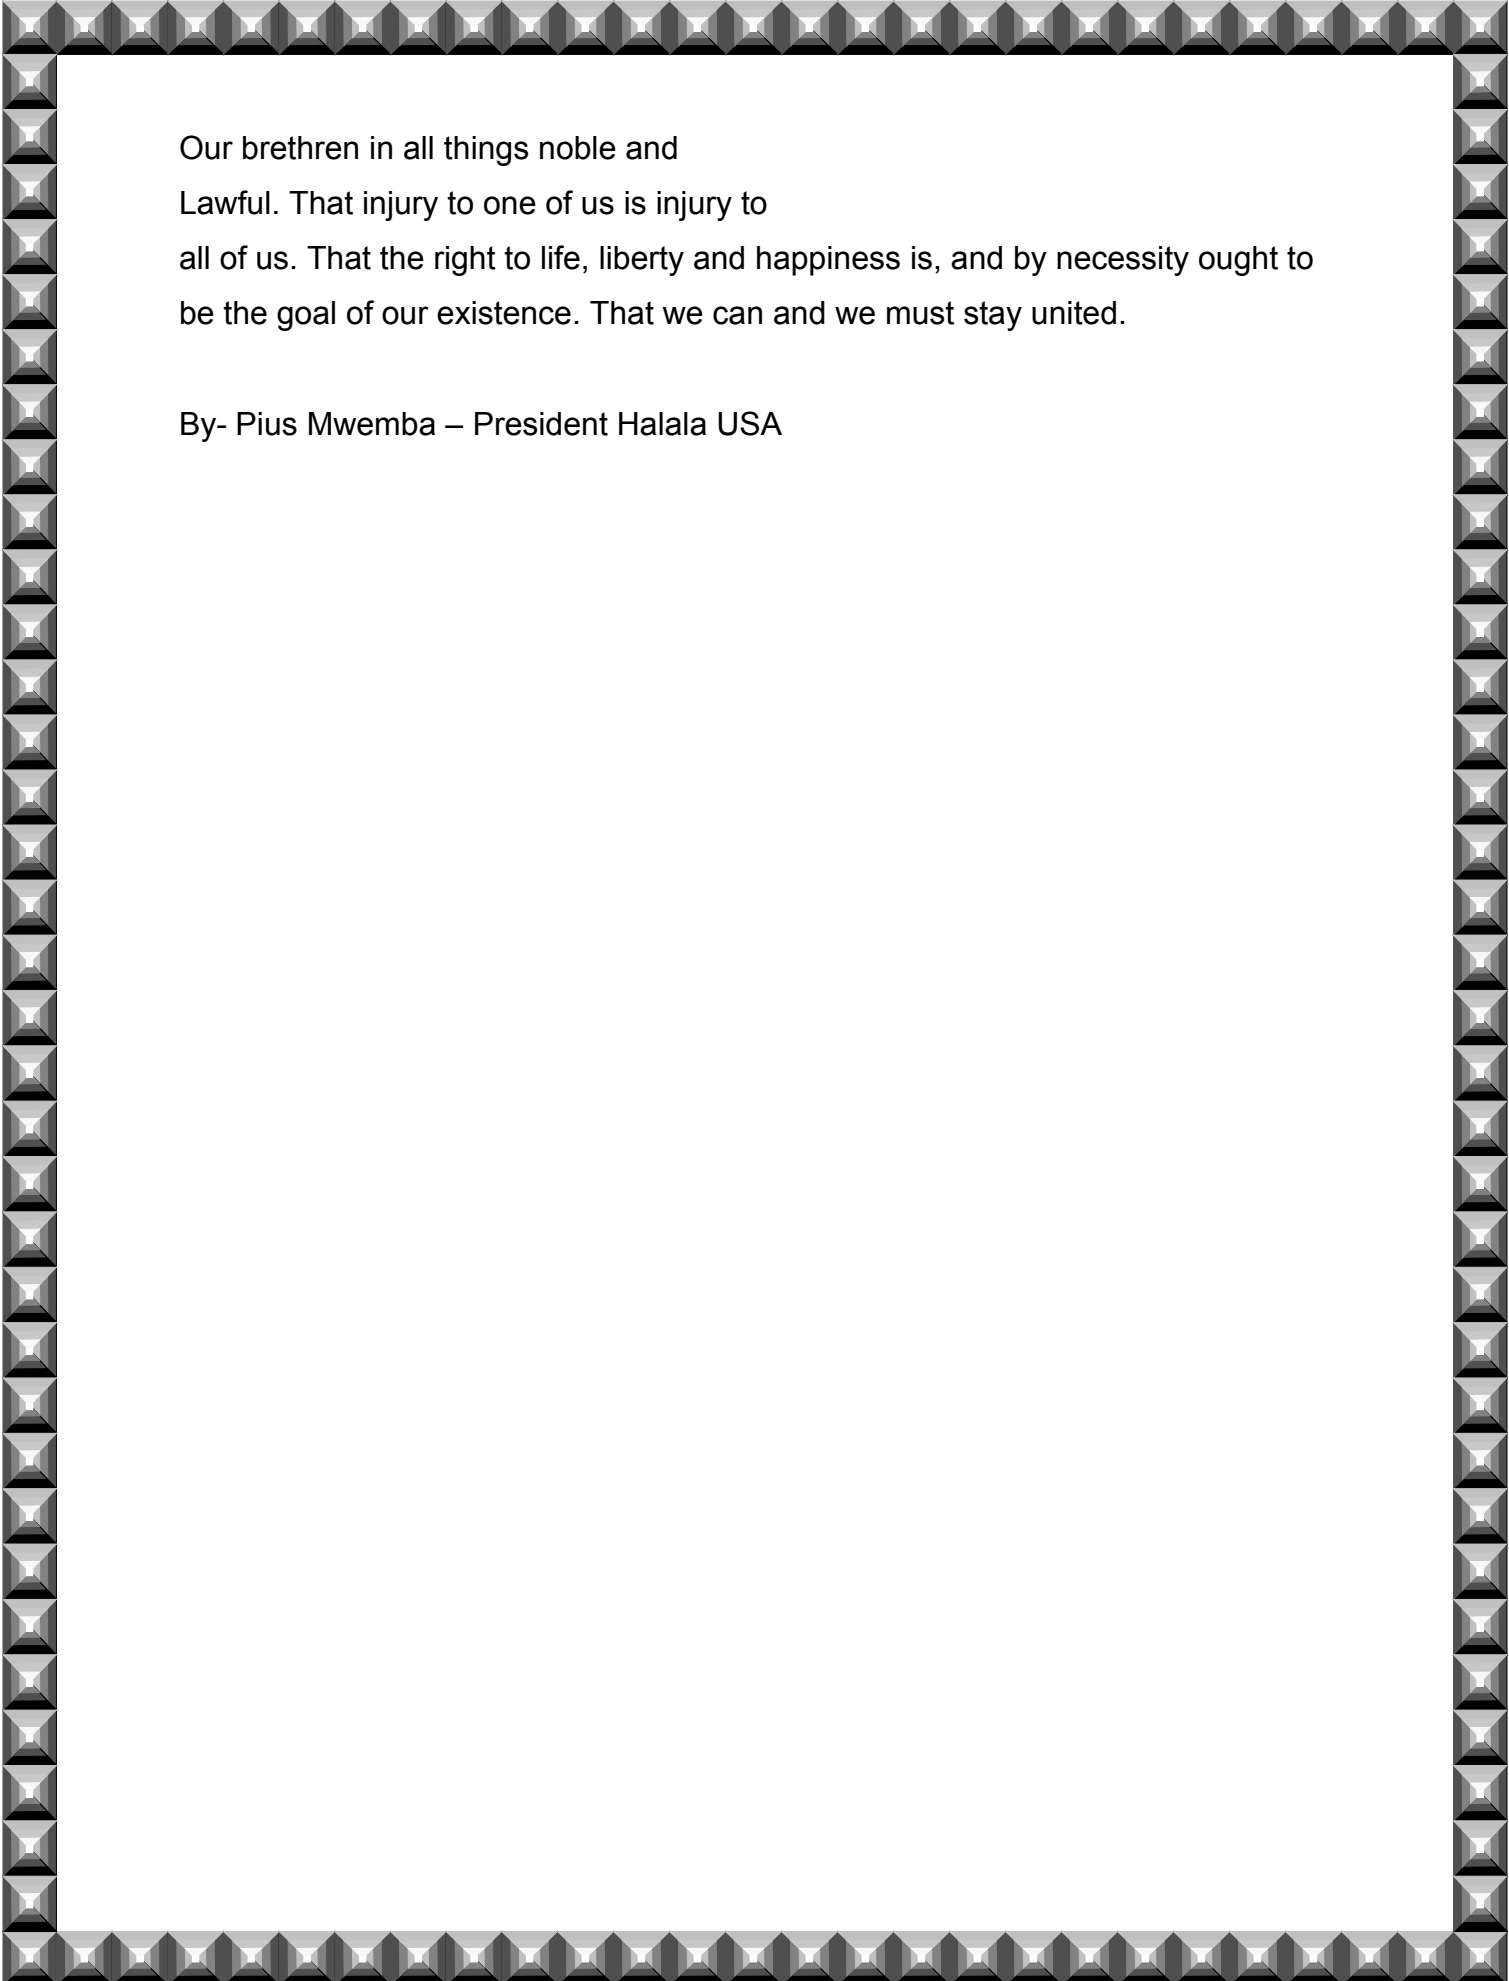

## **IN HALALA**

We believe

In our common Heritage

In our common Interests

That we have a duty to support

Our brethren in all things noble and  
Lawful. That injury to one of us is injury to  
all of us. That the right to life, liberty and happiness is, and by necessity ought to  
be the goal of our existence. That we can and we must stay united.

By- Pius Mwemba – President Halala USA
